

# Embedded Real-Time Systems - 2022/2023

FEUP - M.EIC027

## Topics for seminars

1. Moon landing of Apollo 11 (the moon landing problem and priority assignments)
  - <http://www.hq.nasa.gov/office/pao/History/SP-350/ch-11-4.html>
  - [http://klabs.org/history/apollo\\_11\\_alarms/eyles\\_2004/eyles\\_2004.htm](http://klabs.org/history/apollo_11_alarms/eyles_2004/eyles_2004.htm)
2. Mars Pathfinder (priority inversion problem when scheduling the instrumentation bus)
  - [https://www.cs.unc.edu/~anderson/teach/comp790/papers/mars\\_pathfinder\\_long\\_version.html](https://www.cs.unc.edu/~anderson/teach/comp790/papers/mars_pathfinder_long_version.html)
3. Prototyping an Onboard Scheduler for the Mars 2020 Rover (embedded computer architecture and scheduling options)
  - [https://ai.jpl.nasa.gov/public/documents/papers/rabideau\\_iwpss2017\\_prototyping.pdf](https://ai.jpl.nasa.gov/public/documents/papers/rabideau_iwpss2017_prototyping.pdf)
4. SCHED\_DEADLINE in Linux, and its features  
(Basic algorithm, Multi-processor version, experiments and results, ...)
  - <https://www.youtube.com/watch?v=wzrcWNIneWY>
  - <https://www.kernel.org/doc/Documentation/scheduler/sched-deadline.txt>
5. Boot sequence of embedded Linux in a PC (explain)  
UEFI --> bootloader --> kernel --> OS --> OS services
  - [https://en.wikipedia.org/wiki/Unified\\_Extensible\\_Firmware\\_Interface](https://en.wikipedia.org/wiki/Unified_Extensible_Firmware_Interface)
  - <https://www.quora.com/How-does-the-Linux-boot-process-work>
6. Compare tickless versus tick-based kernels
  - <https://www.quora.com/What-is-a-tickless-kernel>
  - <http://www.freertos.org/low-power-tickless-rtos.html>
  - <http://stackoverflow.com/questions/24105287/what-is-meant-by-real-time-operating-system-tick-time-and-what-is-the-use-of-this>
7. Linux tickless operation (explain)
  - <http://www.cs.columbia.edu/~nahum/w6998/papers/ols2007v2-tickless.pdf>
  - [http://elinux.org/Kernel\\_Timer\\_Systems](http://elinux.org/Kernel_Timer_Systems)
  - [http://elinux.org/High\\_Resolution\\_Timers](http://elinux.org/High_Resolution_Timers)
8. Metrics and benchmarks for RTOS
  - <https://www.embedded.com/measure-your-rtoss-real-time-performance/>
  - [http://ieeexplore.ieee.org/xpls/abs\\_all.jsp?arnumber=6021563&tag=1](http://ieeexplore.ieee.org/xpls/abs_all.jsp?arnumber=6021563&tag=1)
9. Implementation concerns related to priority inheritance
  - <https://www.embedded.com/how-to-use-priority-inheritance/>  
Search for “Against Priority Inheritance”
  - <http://www.math.unipd.it/~tullio/SCD/2007/Materiale/Locke.pdf>
10. Applying Android OS to real-time applications
  - [https://www.researchgate.net/publication/236952843\\_Android\\_and\\_Real-Time\\_Applications\\_Take\\_Care](https://www.researchgate.net/publication/236952843_Android_and_Real-Time_Applications_Take_Care)

11. RT\_PREMPT, bringing real-time to Linux (explain)
  - <https://www.researchgate.net/publication/331290349> The real-time linux kernel A survey on Preempt RT
12. WCET determination (and CPU architectures)
  - <https://www.timing-validation.com/wcet/>
  - <https://pdfs.semanticscholar.org/5c61/6f61e8c9f79453dfd3cdc9300151ef0e43.pdf>
13. AUTOSAR architecture and real-time properties
  - <https://www.autosar.org/>
  - <https://www.automotive-iq.com/electrics-electronics/whitepapers/introduction-autosar-coding-guidelines>
14. General description of eCOS
  - <http://www.ecoscentric.com/news/press-170314.shtml>
15. General description of QNX Neutrino RTOS
  - [https://pt.slideshare.net/raziel\\_lucagbo/qnx-os](https://pt.slideshare.net/raziel_lucagbo/qnx-os)
  - [http://www.qnx.com/developers/docs/6.5.0/index.jsp?topic=%2Fcom.qnx.doc.neutrino\\_user\\_guide%2Fos\\_intro.html](http://www.qnx.com/developers/docs/6.5.0/index.jsp?topic=%2Fcom.qnx.doc.neutrino_user_guide%2Fos_intro.html)
16. General description of VxWorks RTOS
  - <https://resources.windriver.com/vxworks-introductory-video-tour>
  - <https://resources.windriver.com/articles/engineer-complex-connected-systems-for-safety-security-and-reliability-2>
17. General description of FreeRTOS
  - <https://www.freertos.org/about-RTOS.html>

Alternatively, you can choose a topic from the lectures and complement it with material beyond the slides used in the lectures. For example:

- Another Real-Time Operating Systems (RIOT, PikeOS, Zephyr OS, Huawei LiteOS, embOS, Azure RTOS, ...)
- Memory models and their usage in embedded systems
- Cross-compilation process for embedded systems
- Static scheduling with cyclic tables
- Scheduling sporadic tasks
- Synchronization mechanisms to access shared resources
- Handling aperiodic tasks
- Programming embedded systems with real-time Posix
- Programming critical embedded systems

### **Assessment/Grading items**

- Technical accuracy (orally and on the slides) (8 points)
- Trade-off between technical depth and coverage of the topic (4 points)
- Slide Layout (the simpler the better) (3 points)
- Oral flow (fluidity and organization of ideas) (3 points)
- Timeliness (2 points)
